Manhattan T3 v2.02 Release Notes (23/05/23)

The changes below have been implemented since the last official release, v2.00, made on 25/08/21. Please note that v2.01 wasn't officially released; it was distributed directly to customers who reported an issue with creating child profiles on BBC iPlayer that wasn't resolved by a fix in 2.00.

New

- ITVX is supported and will be accessible from the Home Screen from Thursday 25th May 2023.

Resolved

- When browsing backwards in the TV Guide for catch-up content, the T3 could reboot when using the P-UP/P-DOWN buttons or entering channel numbers with the number buttons.
- When resuming HDR content in iPlayer, the TV could fail to switch to HDR.
- When HDMI-CEC was enabled, some TVs could wake up unexpectedly.
- When creating a child profile in BBC iPlayer, the T3 would reboot when entering the month in their date of birth (resolved in v2.01).
